CAMPUS
LE HAVRE-NORMANDIE

REVELATIONS

After a first edition, the festival returns from April 4 to 6 to take you behind the scenes of cinema. This year, the event will highlight the image and use of artificial intelligence in this universe.

Published on 29 March 2024

The image of tomorrow

During these three days, you will be able to attend previews, screenings and even meet image professionals!

From the director of photography to the still photographer, including the screenwriter, the assistant director or even the special effects specialist, come and share a special moment with cinema professionals who will present their jobs to you, essential to the production of movies.

This second edition will above all be an opportunity to question the developments around the image professions, in particular with the advent of artificial intelligence.

Live a filming experience!

Who hasn't dreamed of one day taking part in the adventure of filming? For the second year in a row, the immersive filming experience returns with even more jobs to discover. Whether you feel like an actor, a photographer, a director, a costume designer, a makeup artist, a stuntwoman or a dancer... reveal your hidden talent for a few hours.

Les Révélations invite you to live alone, with friends or family, an immersive and participatory experience through the reconstruction of a film set which will take place on the Quai des Images, at the Docks Vauban. Two routes are offered to you: in front of the lens and/or behind the lens.

To participate in this immersion, you can register on the site:
